Issues to fix

| HIGH | It is recommended to avoid URL parameters and to use hyphens to separate words in the URL structure, rather than underscores. |

| HIGH | To address URL canonicalization issues, it is recommended to select a primary URL for your webpage and set up redirects from all other variations to the preferred one. |

| HIGH | To improve the website experience for your visitors, it is recommended to eliminate any render-blocking resources on this webpage. |

| HIGH | HTTP/2 protocol offers several key improvements, including faster page load times, |

improved performance, better security and more efficient use of network resources.

HIGH By creating a custom 404 error page with helpful links and information, users are more likely to stay on the site and continue to explore.

HIGH Build quality backlinks from websites relevant to your topic/niche to improve your search engine rankings.

MEDIUM To provide a good user experience, Google recommends that sites should aim for a First Contentful Paint value of 1.8 seconds or less.

MEDIUM Serve properly sized images to reduce page loading times and to improve user's experience.

MEDIUM Using social media meta tags can improve the appearance and content of shared links on social media platforms, potentially increasing click-through rates and engagement with the page.

LOW Resolving errors identified by the Chrome DevTools Console can improve user experience.

LOW For security reasons, it is recommended to turn off the server signature.

LOW Using more than 20 HTTP requests on a webpage can negatively impact the loading time.

LOW Consider moving inline CSS styles to an external stylesheet to improve site performance and maintain separation of content and design.

LOW Consider adding the Strict-Transport-Security header to your webpage to ensure that web traffic is encrypted over HTTPS, mitigating the risk of man-in-the-middle attacks and other security threats.

This webpage is using social media meta tags.

✅ https://zenoti.com

This webpage is using social media meta tags.

Most Common Keywords Test

https://feelaxo.com

There is likely no optimal keyword density (search engine algorithms have evolved beyond keyword density metrics as a significant ranking factor). It can be useful, however, to note which keywords appear most often on your page and if they reflect the intended topic of your page. More importantly, the keywords on your page should appear within natural sounding and grammatically correct copy.

66 salons	49 spas	20 delhi	13 road	12 east

3 Failed   **1** Warnings   **21** Passed

HTML Page Size Test

✅ https://feelaxo.com

The size of this webpage's HTML is **8.29 Kb** and is under the average webpage's HTML size of **33 Kb**. Faster loading websites result in a better user experience, higher conversion rates, and generally better search engine rankings.

✅ https://salonist.io

The size of this webpage's HTML is **23.44 Kb** and is under the average webpage's HTML size of **33 Kb**. Faster loading websites result in a better user experience, higher conversion rates, and generally better search engine rankings.

❌ https://fresha.com

The size of this webpage's HTML is **94.93 Kb**, and is greater than the average size of **33 Kb**! This can lead to slower loading times, lost visitors, and decreased revenue. Good steps to reduce HTML size include: using HTML compression, CSS layouts, external style sheets, and moving javascript to external files.

❌ https://zenoti.com

The size of this webpage's HTML is **161.08 Kb**, and is greater than the average size of **33 Kb**! This can lead to slower loading times, lost visitors, and decreased revenue. Good steps to reduce HTML size include: using HTML compression, CSS layouts, external style sheets, and moving javascript to external files.

DOM Size Test

✅ https://feelaxo.com

The Document Object Model (DOM) of this webpage has **385 nodes** which is less than the recommended value of 1,500 nodes.

✅ https://salonist.io

The Document Object Model (DOM) of this webpage has **1,223 nodes** which is less than the recommended value of 1,500 nodes.

❌ https://fresha.com

The Document Object Model (DOM) of this webpage has **6,165 nodes** which is greater than the recommended value of 1,500 nodes! A large DOM size negatively affects site performance and increases the page load time.

❌ https://zenoti.com

The Document Object Model (DOM) of this webpage has **1,982 nodes** which is greater than the recommended value of 1,500 nodes! A large DOM size negatively affects site performance and increases the page load time.

HTML Compression/GZIP Test

✅ https://feelaxo.com

This webpage is successfully compressed using **gzip compression** on your code. The HTML code is compressed from **39.34 Kb** to **8.29 Kb (79% size savings)**. This helps ensure a faster loading webpage and improved user experience.

✅ https://salonist.io

This webpage is successfully compressed using **gzip compression** on your code. The HTML code is compressed from **118.85 Kb** to **23.44 Kb (80% size savings)**. This helps ensure a faster loading webpage and improved user experience.

✅ https://fresha.com

This webpage is successfully compressed using **br compression** on your code. The HTML code is compressed from **1050.81 Kb** to **94.93 Kb (91% size savings)**. This helps ensure a faster loading webpage and improved user experience.

✅ https://zenoti.com

This webpage is successfully compressed using **gzip compression** on your code. The HTML code is compressed from **592.41 Kb** to **161.08 Kb (73% size savings)**. This helps ensure a faster loading webpage and improved user experience.

Site Loading Speed Test

✅ https://feelaxo.com

The loading time of this webpage (measured from N. Virginia, US) is around **2.08 seconds** and this is under the average loading speed which is **5 seconds**.

❌ https://salonist.io

The loading time of this webpage (measured from N. Virginia, US) is around **5.16 seconds** and is greater than the average loading speed which is **5 seconds**!

❌ https://fresha.com

The loading time of this webpage (measured from N. Virginia, US) is around **7.82 seconds** and is greater than the average loading speed which is **5 seconds**!

❌ https://zenoti.com

The loading time of this webpage (measured from N. Virginia, US) is around **10.88 seconds** and is greater than the average loading speed which is **5 seconds**!

JS Execution Time Test

✅ https://feelaxo.com

The JavaScript code used by this webpage is executed in less than **2 seconds.**

✅ https://salonist.io

The JavaScript code used by this webpage is executed in less than **2 seconds.**

❌ https://fresha.com

The JavaScript code used by this webpage is executed in more than **3.5 seconds**! When the JavaScript code takes a long time to execute, it slows down the page performance in several ways: longer download times, main thread bottlenecks, delays of "Time To Interactive", memory leaks, etc.

❌ https://zenoti.com

The JavaScript code used by this webpage is executed in more than **3.5 seconds**! When the JavaScript code takes a long time to execute, it slows down the page performance in several ways: longer download times, main thread bottlenecks, delays of "Time To Interactive", memory leaks, etc.

Page Objects Test

❌ https://feelaxo.com

This webpage is using more than **20 http requests**, which can slow down page loading and negatively impact user experience!

CDN Usage Test

⚠️ https://feelaxo.com

This webpage is not serving all resources (images, javascript and css) from CDNs!

⚠️ https://salonist.io

This webpage is not serving all resources (images, javascript and css) from CDNs!

✅ https://fresha.com

This webpage is serving all images, javascript and css resources from CDNs.

✅ https://zenoti.com

This webpage is serving all images, javascript and css resources from CDNs.

Modern Image Format Test

✅ https://feelaxo.com

This webpage is using images in a modern format.

❌ https://salonist.io

This webpage is not serving images in a modern format! Image formats like JPEG 2000, JPEG XR, and WebP often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.

✅ https://fresha.com

This webpage is using images in a modern format.

❌ https://zenoti.com

This webpage is not serving images in a modern format! Image formats like JPEG 2000, JPEG XR, and WebP often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.

Image Metadata Test

✅ https://feelaxo.com

This webpage is not using images with large metadata.

✅ https://salonist.io

This webpage is not using images with large metadata.

❌ https://fresha.com

This webpage is using images with large metadata (**more than 16% of the image size**)! Stripping out unnecessary metadata tags can improve not only the loading time but also the security and privacy of a webpage.

✅ https://zenoti.com

This webpage is not using images with large metadata.

Image Caching Test

✅ https://feelaxo.com

This website is using cache headers for images and the browsers will display these images from the cache.

⚠️ https://salonist.io

This website is not using cache headers for all images! Setting cache headers can help speed up the serving of a webpage for returning users. Learn more about how to add expires headers to your images.

✅ https://fresha.com

This website is using cache headers for images and the browsers will display these images from the cache.

✅ https://zenoti.com

This webpage is not using uncached images from same domain.

JavaScript Caching Test

✅ https://feelaxo.com

This webpage is using cache headers for all JavaScript resources.

✅ https://salonist.io

This webpage is using cache headers for all JavaScript resources.

✅ https://fresha.com

This webpage is using cache headers for all JavaScript resources.

✅ https://salonist.io

All CSS resources used by this webpage are minified.

✅ https://fresha.com

All CSS resources used by this webpage are minified.

✅ https://zenoti.com

All CSS resources used by this webpage are minified.

Render Blocking Resources Test

❌ https://feelaxo.com

This webpage is using render blocking resources! Eliminating render-blocking resources can help this webpage to load significantly faster and will improve the website experience for your visitors.

❌ https://salonist.io

This webpage is using render blocking resources! Eliminating render-blocking resources can help this webpage to load significantly faster and will improve the website experience for your visitors.

❌ https://fresha.com

This webpage is using render blocking resources! Eliminating render-blocking resources can help this webpage to load significantly faster and will improve the website experience for your visitors.

❌ https://zenoti.com

This webpage is using render blocking resources! Eliminating render-blocking resources can help this webpage to load significantly faster and will improve the website experience for your visitors.

Nested Tables Test

✅ https://feelaxo.com

This webpage is not using nested tables. This speeds up page loading time and optimizes the user experience.

✅ https://salonist.io

This webpage is not using nested tables. This speeds up page loading time and optimizes the user experience.

✅ https://fresha.com

This webpage is not using nested tables. This speeds up page loading time and optimizes the user experience.

✅ https://zenoti.com

This webpage is not using nested tables. This speeds up page loading time and optimizes the user experience.

Frameset Test

✅ https://feelaxo.com

This webpage does not use frames.

✅ https://salonist.io

This webpage does not use frames.

✅ https://fresha.com

This webpage does not use frames.

✅ https://zenoti.com

This webpage does not use frames.

Doctype Test

https://feelaxo.com

This webpage has a doctype declaration.

> *<!DOCTYPE html>*

https://salonist.io

This webpage doesn't have a doctype declaration and this may cause rendering problems!

https://fresha.com

This webpage has a doctype declaration.

https://zenoti.com

This webpage has a doctype declaration.

URL Redirects Test

✅ https://feelaxo.com

This URL doesn't have any redirects (which could potentially cause site indexation issues and site loading delays).

✅ https://salonist.io

This URL doesn't have any redirects (which could potentially cause site indexation issues and site loading delays).

⚠️ https://fresha.com

This URL performed 1 redirects! While redirects are typically not advisable (as they can affect search engine indexing issues and adversely affect site loading time), one redirect may be acceptable, particularly if the URL is redirecting from a non-www version to its www version, or vice-versa.

⚠️ https://zenoti.com

This URL performed 1 redirects! While redirects are typically not advisable (as they can affect search engine indexing issues and adversely affect site loading time), one redirect may be acceptable, particularly if the URL is redirecting from a non-www version to its www version, or vice-versa.

Largest Contentful Paint Test

✅ https://feelaxo.com

The Largest Contentful Paint duration of this webpage is **0.0** seconds. To provide a good user experience, Google recommends that sites should strive to have Largest Contentful Paint of **2.5** seconds or less.

⚠️ https://salonist.io

The Largest Contentful Paint duration of this webpage is **3.58** seconds. To provide a good user experience, Google recommends that sites should strive to have Largest Contentful Paint of **2.5** seconds or less.

❌ https://fresha.com

The Largest Contentful Paint duration of this webpage is **6.76** seconds. To provide a good user experience, Google recommends that sites should strive to have Largest Contentful Paint of **2.5** seconds or less.

✅ https://zenoti.com

The Largest Contentful Paint duration of this webpage is **1.26** seconds. To provide a good user experience, Google recommends that sites should strive to have Largest Contentful Paint of **2.5** seconds or less.

Cumulative Layout Shift Test

✅ https://feelaxo.com

The CLS score of this webpage is **0.0087**. To provide a good user experience, Google recommends that sites should strive to have a CLS score of **0.1** or less.

> **DOM element which contributes the most to CLS score:**
>
> **Text:** Mumbai Pune South Delhi Navi mumbai North Goa Thane Bengaluru Central Delhi Kolk...
> **Html:** *<div class="city_button_wrap">*
> **Score:** 0.0051

✅ https://salonist.io

The CLS score of this webpage is **0.0507**. To provide a good user experience, Google recommends that sites should strive to have a CLS score of **0.1** or less.

✅ https://fresha.com

The CLS score of this webpage is **0.0750**. To provide a good user experience, Google recommends that sites should strive to have a CLS score of **0.1** or less.

⚠️ https://zenoti.com

The CLS score of this webpage is **0.1102**. To provide a good user experience, Google recommends that sites should strive to have a CLS score of **0.1** or less.

This webpage doesn't take the advantages of HTML Microdata or JSON-LD specifications in order to use structured data! View Google's guide for getting started with structured data.

✅ https://zenoti.com

This webpage is using structured data.

Custom 404 Error Page Test

❌ https://feelaxo.com

This website is not using a custom 404 error page! Default 404 error pages result in a poor experience - it can mislead users into thinking an entire site is down or broken, greatly increases the chance they leave the website entirely, and looks unprofessional. We recommend to have a custom 404 error page in order to improve the website's user experience by letting users know that only a specific page is missing/broken (and not the entire site), providing them helpful links, the opportunity to report bugs, and potentially track the source of broken links.

❌ https://salonist.io
